Tampa, FL 33613

Dedicated and detail-oriented professional seeking a Technical Writer position to translate complex technical architectures into highly accessible developer reference materials, end-user tutorials, and standard operating procedures (SOPs). Leverages a strong background in instructional design, database cataloging, and hardware troubleshooting to collaborate with engineering teams. A highly adaptable critical thinker committed to executing documentation-as-code workflows while driving team-wide project alignment.

Professional Experience

Library Service and Technology Guide 2, Hillsborough County Public Library Cooperative (January 2025-Present)

- Diagnosed, isolated, and resolved complex hardware and software anomalies for end-users across diverse ecosystems, including integrated library databases, automated circulation systems, digital media platforms, and general office machinery.
- Conceptualized, developed, and delivered technical curriculum and step-by-step training content for public digital literacy programs and internal staff onboarding; facilitated both group classroom training and high-touch, one-on-one technical coaching.
- Managed and audited complex catalog databases, ensuring data integrity by updating metadata records, organizing structural acquisition taxonomies, and embedding digital imagery and media configurations to maximize resource searchability.
- Evaluated collection health and hardware configurations, executing quality control protocols to ensure technical resources and physical displays adhered strictly to organizational compliance standards and preservation policies.
- Assumed full building and operational in-charge responsibilities; monitored, trained, and evaluated subordinate technical support staff while ensuring daily workflows maintained strict alignment with county policies and standard operating procedures (SOPs).
